

THE DELTA ALLOY ANALYZER

INNOV X SYSTEMS
Innovative XRF Technologies

NO COMPROMISES

SMART ON THE INSIDE

- Lightning fast electronics and sample throughput
- Accurate, reliable results
- Most comprehensive light element and light alloy capabilities

TOUGH ON THE OUTSIDE

- Fully industrialized, weatherproof
- Rugged overmolding, ergonomic single chassis design
- State-of-the-art Blanview display for the brightest easy-to-read results

Ask about our newest features and how they can revolutionize your business!

TAKE METAL TO A SORTING HIGHER LEVEL

**Innov-X Systems & Steinert
have partnered to bring XRF to
the scrap market.**

Innov-X's proven, unique XRF technology combined with Steinert's reliable, tough system design results in a system that sorts based on elemental composition of scrap.

Allowing the recycling market to truly take **non-ferrous** metal sorting to a higher level.

WANT MEATBALLS?

Neither do we.

**Innov-X Systems & Steinert have
partnered to bring XRF to the scrap
market.**

Innov-X's proven, unique XRF technology combined with Steinert's reliable, tough system design results in a system that sorts based on the elemental composition of scrap.

THE ULTIMATE MEATBALL SORTING SOLUTION
